

AMSN VERMICULITE COATED CLOTH

AMSN Vermiculite Coated cloth is a woven fabric manufactured from texturized fiberglass yarns and coated with a vermiculite coating that enhances the temperature resistance up to 1000 deg. F.

AMSN Vermiculite Coated cloths have high heat resistance, excellent dimensional stability, high chemical resistance (except for hydrofluoric and phosphoric acids, and hydrogen chloride), high tensile strength and excellent electrical properties.

AMSN Vermiculite Coated cloths are used for removable insulation blankets, weld curtains, fire blankets, and many other applications where high temperature and fame protection are required.
